How was this information gathered? I performed a search on TwitterGrader using key terms like: Staffing, Recruiting, Recruiter and "Talent Acquisition." I then scraped the data using **Mozenda**

and parsed it into a spreadsheet. Simple.

The information in this report was collected on [2.26.09](#). I would be shocked if I did not miss someone. If that person is you, please follow me and DM me and I will add you on the next edition of the **Twittering Recruiters Directory**.
